Master Plan Process

Master Plans are planning documents that guide implementation over a period of years as funding for those improvements become available.

Master Plans typically look like multi-page documents that outline analysis of a site's current conditions, community engagement that informs the process, and concept designs in plan form and sometimes renderings that graphically depict the potential for park improvements as guided by the community.

Funding that has been approved to date for Memorial Park is for the purposes of conducting the Master Plan process only. No funding for the implementation (construction) of improvements has been identified or discussed.

Where We Are At Today

IMPORTANCE OF THE PARK IN THE COMMUNITY, EL PASO'S HISTORY,
AND THE HISTORICAL RESOURCES WITHIN THE PARK

The last major updates to Memorial Park general uses were over 20 years ago.

Although the park has experienced periods of decline and neglect, it has continuously served the surrounding community as a place for events, gatherings, recreational activities, celebrations, and respite from city life.

This Master Plan effort serves to envision the future of Memorial Park, preserve its history, protect its special features, and improve amenity offerings for users of today and the future.

What We've Heard to Date: Conclusions

- Memorial Park as it currently stands is:

An important piece of El Paso history

Disconnected

Underutilized

An important green respite for
relaxation and recreation

- Engagement helped us reinforce the project goals:

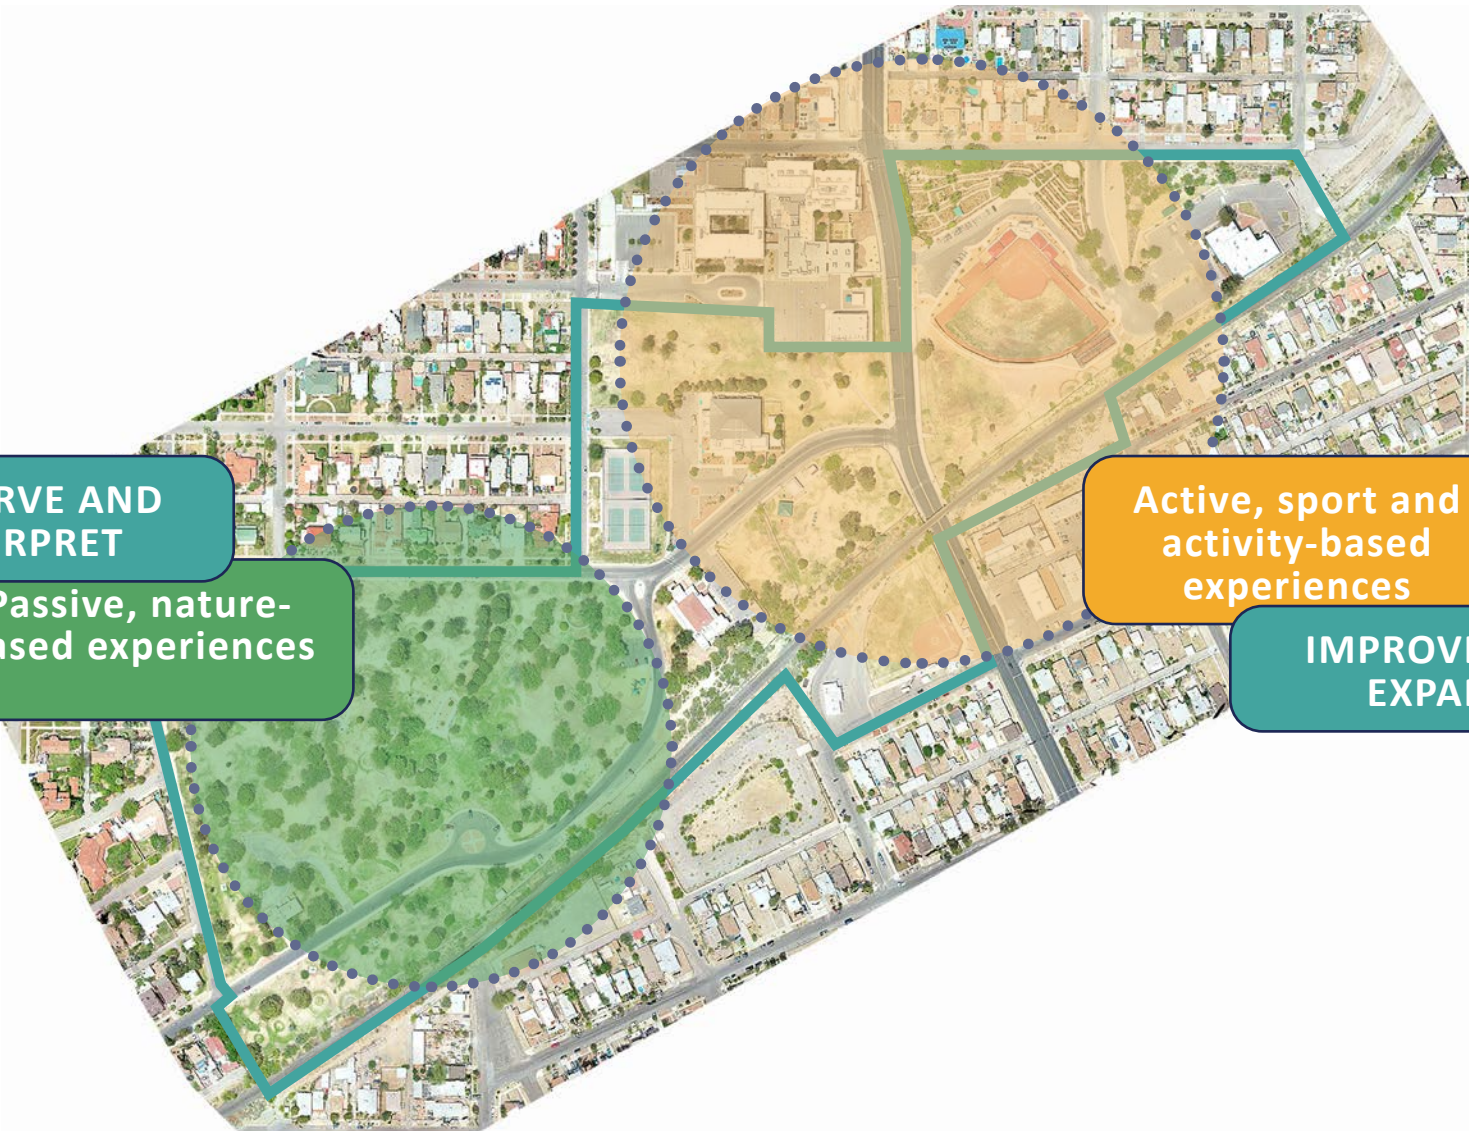

- Reveal
- Activate
- Knit
- Rejuvenate
- Unify

This Master Plan will **Reveal** and **Rejuvenate** existing and historical sections to **Activate** their possibilities and **Knit** the park as a whole, **Unifying** Memorial Park's diverse users.
